"Curiosity is the wick in the candle of learning" – William Arthur Ward

Summary

I am interested in Software Engineering (SE), particularly Empirical Software Engineering (Human/User Studies), AI for SE and SE for AI, and Program Analysis. My research has attracted **~$500K AUD as Sole PI** from the Australian Research Council. I am also a collaborator of more than **$2M AUD** of research funding awarded by NSF (USA), and Singapore Ministry of Education. My work has inspired the first-ever automated bug fixing system, namely GetAFix, deployed at Meta in 2019.

I am currently managing a ~$500K AUD of funding from the Australian Research Council Discovery Award (ARC DECRA) as sole PI, supervising three PhD students, have graduated three master's students by research, and led 40 master's students (~10 students per group) working with industry partners to deliver various successful projects such as web design, blockchain-based payment system, etc. Under my primary supervision, my students have won prestigious prizes such as **Distinguished Paper Award**, **Google PhD Fellowship**, **University Endeavor Awards, and Best Undergraduate Thesis Award**.

I enjoy building automated reasoning systems, such as deductive verification (see publications [7]), symbolic execution and program synthesis (see publications [11]), grammar-based fuzzing (see publications [15]), and multi-version reasoning (see publications [20]). Other than that, I also love building systems that automatically mines massive amounts of past software artifact data such as source code patterns, e.g., graph-based mining of bug fix patterns (see publications [4]).

I lecture on various subjects at The University of Melbourne such as Models of Computation (600 students), Programming Language and Implementation – Compiler Theory (45 students), Object-oriented Software Development (400 students), etc.

Appointments

(Tenured) Assistant Professor | The University of Melbourne, Australia | July'19 – Present, officially Tenured/Confirmed from September 2023.

ARC DECRA Fellow – Sole PI of $488K AUD awarded by the Australian Research Council for Discovery Early Career Researcher| January 2022 – 2024

Education

PostDoc | Carnegie Mellon University, Silicon Valley, USA | June'18 – June'19

- *Project*: ISSTAC: Integrated Symbolic Execution for Space-Time Analysis of Code, aiming at software vulnerabilities detection/prevention, funded by DARPA for Space-Time Analysis of Cyber-Security.

- *Advisor*: ACM Distinguished Scientist & Associate Prof. Corina Pasareanu

Ph.D. Residency Training | Carnegie Mellon University, Pittsburgh, USA | Aug'15 – June'16

- *Project*: Automatic software repair, as part of research collaboration program LARC-CMU of Singapore Management University with Carnegie Mellon University as a strategic partner.
- *Advisor*: Associate Prof. Claire Le Goues

Ph.D. Candidate | Singapore Management University, Singapore | Jan'14 – May'18

- *Thesis*: "Overfitting in Automated Program Repair: Challenges and Solutions". Automatic software repair using Machine Learning, Data Mining, Program Synthesis, Analysis and Verification.
- *Advisor*: Prof. David Lo

B. Tech. | Hanoi University of Science and Technology, Vietnam | Aug'07 – May'12

- *Thesis*: HIP/SLEEK: Static verification of heap-manipulating programs via Separation Logic.
- Degree obtained under collaboration program with Keio University, Japan, supported by Japanese ODA
- *Advisors*: Associate Prof. Quyet-Thang Huynh and Associate Prof. Wei-Ngan Chin

Additional Research Experience

Research Assistant | National University of Singapore, Singapore | Feb'12 – May'12 & Aug'12 – Nov'13

- *Project*: HIP/SLEEK: Static verification of heap-manipulating programs via Separation Logic, aiming at verifying C-like programs using SAT, Separation Logic, and Hoare-style deductive verification.
- *Advisor*: Associate Prof. Wei-Ngan Chin

Research Intern | Nagoya University, Japan | Aug'11

- *Project*: Building a Twitter-like social network using C#.
- *Advisor*: Prof. Toyohide Watanabe

Industry Internship

FSoft (FPT Software) | Vietnam | Aug'11

- *Project*: Building a web service application using JSP, as part of undergraduate internship program collaborated between Hanoi University of Science and Technology, and FPT Software company.
- *Company website*: https://www.fpt-software.com/

Certificates

- Fundamental Information Technology Engineer Skill Standards (FE) Certification, **Japan IT Engineers Examination Center**. Certified by the Ministry of Science and Technology, 2011

Honors & Awards

- **Distinguished Paper Award** at The 39th International Conference on Software Maintenance and Evolution (ICSME), 2023.
- **Australian Research Council Discovery Early Career Researcher Award ($488K),** 2022 – 2024
- PhD Scholarship at Singapore Management University, 2014 – 2018.

- PhD Exchange Scholarship to Carnegie Mellon University, 2015 – 2016.
- Best Undergraduate Thesis, Higher Education Development Support Project on ICT (HEDSPI), Hanoi University of Science and Technology (HUST), 2012.
- Undergraduate Internship Scholarship to Nagoya University, 2011.
- First Prize in Mathematics (best among ~200 selected students), Nghe An Province, Vietnam, 2005.
- First Prize in Mathematics (best among ~200 selected students), Nghe An Province, Vietnam, 2000.

Languages

- **English**: Professional working level
- **Japanese**: Intermediate level (JLPT Level 2, obtained in 2009)
- **Vietnamese**: Native

Computer Skills

- **Programming**: Scala, Java, Ocaml, Bash, Python, Haskell, Latex, C, C#, C++, Prolog
- **Machine learning**: Classification (WEKA library), Active Learning (JCLAL library)
- **Databases**: PostgreSQL, MYSQL, Google BigQuery
- **Eclipse Plugin**: See https://xuanbachle.github.io/semanticsrepair/

Note: I developed several projects using the above programming languages during my PhD study. The largest project that I developed involves a mix of 14K lines of code in Scala and 3K lines of code in Java.

Articles

Note: My students are indicated by double underline.

PhD thesis.
Overfitting in automated program repair: Challenges and Solutions.
Xuan Bach D Le
PhD Thesis, Singapore Management University, Singapore, May 2018.

Books.
[32] **Book Chapter: Recent Advances in Symbolic Pathfinder.**
Corina Pasareanu, Yannic Noller, Aymeric Fromherz, Bach D.X. Le, Wilem Visser, Tevfik Bultan and William Eiers
Automatic Software Verification, Book Chapter, 2023.

Publications.
[31] **Are We Ready to Embrace Generative AI for Software Q&A?**
Bowen Xu, Thanh-Dat Nguyen, Thanh Le-Cong, Thong Hoang, Jiakun Liu, Kisub Kim, Chen GONG, Changan Niu, Chenyu Wang, Xuan-Bach D. Le, David Lo
The 38th IEEE/ACM International Conference on Automated Software Engineering **(ASE)**, New Ideas Track, 2023.

[30] **The Future Can't Help Fix The Past: Assessing Program Repair In The Wild.**
Vinay Kabadi, Dezhen Kong, Siyu Xie, G. Arthar, Lingfeng Bao, Tien-Duy BL, Xuan-Bach D. Le, and David Lo
The 39th IEEE International Conference on Software Maintenance and Evolution **(ICSME)**, 2023.
Won **Distinguished Paper Award** – the only paper among the accepted paper that won the prize.

(Acceptance rate ~22%)

[29] **Multi-Granularity Detector for Vulnerability Fixes.**
Truong Giang Nguyen, Thanh Le-Cong, Hong Jin Kang, Ratnadira Widyasari, Chengran Yang, Zhipeng Zhao, Bowen Xu, Jiayuan Zhou, Xin Xia, Ahmed Hassan, Xuan-Bach D. Le, and David Lo
Transactions on Software Engineering **(TSE)** Journal, 2023

Recent Unpublished Work

[33] **Adversarial Patch Generation for Automatic Program Repair,** Aziz Alhefdhi, Cong-Thanh Le, Khanh-Hoa Dam, Bach Le, Aditya Ghose under submission to Software Quality Journal.

[34] **Refining ChatGPT-Generated Code: Characterizing and Mitigating Code Quality Issues,** Yue Liu, Cong-Thanh Le, Ratnadira Widyasari, Chakkrit Tantithamthavorn, Li Li, Xuan-Bach D. Le, David Lo, under submission to TSE'23.

[35] **PatchZero: Zero-Shot Automatic Patch Correctness Assessment,** Xin Zhou, Bowen Xu, Kisub Kim, DongGyun Han, Cong-Thanh Le, Junda He, Xuan-Bach D. Le, David Lo under submission to TSE'23.

[36] **Mining Graphs to Attack Code Models,** Thanh-Dat Nguyen, Zhou Zhang, Xuan-Bach D. Le, Patanamon Thongtanunam, David Lo, under submission.

[37] **GNN-Infer: Property Inference for Graph Neural Network,** Thanh-Dat Nguyen, Hieu Nguyen, Cong-Thanh Le, Xuan-Bach D. Le, David Lo, ThanhVu Nguyen, Corina Pasareanu, under submission.

Student Supervision

PhD students: All three PhD students are under my primary supervision.

- Vinay Kabadi, Part-time PhD student at The University of Melbourne.
  - Thesis topic: Empirical study on software debugging, January 2020 - now.
  - Award: **Distinguished Paper Award** at ICSME'23.
  - I am primary advisor, co-advising with Dr. Patanamon Thongtanunam (Senior Lecturer at CIS) and Dr. Chistoph Treude (Senior Lecturer at CIS)
- Thanh-Dat Nguyen, Full-time PhD student at The University of Melbourne.
  - Thesis topic: Software debugging and AI: reciprocal improvement, April 2021 - now.
  - I am primary advisor, co-advising with Dr. Patanamon Thongtanunam (Senior Lecturer at CIS)
- Cong-Thanh Le, Joining PhD program at The University of Melbourne in January 2023. Cong-Thanh has been under my supervision since 2019, graduated from Hanoi University of Science and Technology (HUST) in 2019.
  - Thesis topic: Automated program repair, Feb 2023 – now.
  - Awards: **Best Undergraduate Thesis** from HUST in 2019. **Google PhD Fellowship** in 2023.
  - I am primary advisor, co-advising with Dr. Toby Murray (Associate Professor at CIS)

Master's students:

- Ishan Maholtra, master's student from The University of Melbourne, 2019 – 2020 (graduated).
  - Topic: Automated Repair of student programming assignments.
  - I am primary advisor.
- Chijiang Yang, master's student from The University of Melbourne, 2020-2021 (graduated).
  - Topic: Unified debugging: how far are we?
  - I am primary advisor.
- Shubham Parth, master's student from The University of Melbourne, 2020-2021 (graduated).
  - Topic: Smart contract fuzzing.
  - I am second advisor, co-advising with Dr. Van-Thuan Pham (Senior Lecturer at CIS)

Undergraduate students:

- Thanh Le Cong, undergraduate student at Hanoi University of Science and Technology, 2019 – now
  - Award: **Best Undergraduate Thesis Award** at HUST in 2019.
  - Topic: Automated Program Repair.
- Siyu Xie, female undergraduate student from Zhejiang University, China, visited SMU during 2017 - 2018. This resulted in a full research paper on automatic repair, now under submission.
  - Award: **Distinguished Paper Award** at ICSME'23 (together with Vinay Kabadi)
- Hanliang Zhang, undergraduate student from Peking University, China during Google Summer of Code, 2019

Project Supervision

I regularly supervise groups of ~10 students per group working on their master's projects across organizations, e.g., university and industry. The projects span one semester (12 weeks) or three semesters (1 year). Notable projects, **that won University Endeavor Award**, include:

- **Reusable coffee cup**: build an online management system that allows users to borrow and return coffee cups when buying coffee. (1-year project, 2019 - 2020)
- **Apollo Music**: build a blockchain-based system that allows the music industry to manage payments for music shows, e.g., online blockchain-based smart contract to pay artists and promoters for music shows. (1-year project, 2020 - present)

Teaching

- **Lecturer/Coordinator**: Models of Computation, The University of Melbourne, 2022 (~600 students enrolled). This is a core (required) subject in Computer Science at Unimelb.
- **Lecturer/Coordinator**: Models of Computation, The University of Melbourne, 2021 (~600 students enrolled). This is a core (required) subject in Computer Science at Unimelb.
- **Lecturer**: Programming Language Implementation (Compiler Theory), The University of Melbourne, 2020 (~40 students enrolled) – Graduate Level
- **Lecturer/Coordinator**: Object-Oriented Software Development, The University of Melbourne, 2019, 2021, 2023 (~350 students enrolled)
- **Lecturer/Coordinator**: Masters Software Engineering Project, The University of Melbourne, 2020 (~120 students enrolled) – Graduate Level
- **Guest Lecturer**: Program Analysis and Modeling, Graduate level, SMU, 2018
- **Teaching Assistant**: Software Mining and Analysis, Graduate level, SMU, 2018
- **Teaching Assistant**: Analytics Foundations, Undergraduate level course, SMU, 2017

Activities

- **Invited talks:**
  - Invited speaker at NASA Robust Software Engineering, California, USA. Topic: Recent Advances on Automated Program Repair.
  - Top 4 speakers invited to serve on the expert panel to talk about the Future of Automated Program Repair at Automated Program Repair workshop, collocated with ICSE'23 in Melbourne, Australia.
  - Invited speaker at Monash University, 2019 and 2023. Topic: Automated Software Debugging and Repair.
- **Charing role**:
  - Chair of Software Engineering Track for the 11th International Symposium on Information and Communication Technology (SoICT), 2022
  - Chair of Demonstration Track for the IEEE International Conference on Blockchain and Cryptocurrency (ICBC), 2022
  - Chair of Student Research Competition for the 36th IEEE/ACM International Conference on Automated Software Engineering (ASE), 2021
- **Committee Member** for:
  - The 45th International Conference on Software Engineering (ICSE), 2023, Research Track
  - The 44th International Conference on Software Engineering (ICSE), 2022, Software Engineering in Practice Track
  - The 43rd International Conference on Software Engineering (ICSE), 2021, New Ideas Track
  - The 36th IEEE/ACM International Conference on Automated Software Engineering (ASE), 2021. Research Track
  - The ACM SIGSOFT International Symposium on Software Testing and Analysis (ISSTA), 2020, Research Track
  - The 35th IEEE/ACM International Conference on Automated Software Engineering (ASE), 2020. Research Track
  - The 42nd International Conference on Software Engineering (ICSE), 2020, New Ideas Track

- The ACM SIGSOFT International Symposium on Software Testing and Analysis (ISSTA), Artifact Evaluation Committee, 2019
- The 19th IEEE International Conference on Software Quality, Reliability, and Security (QRS), 2019
- International Workshop on Intelligent Bug Fixing (IBF), 2019

- **Reviewer** for:
  - IEEE Transactions on Network and Service Management (TNSM), 2022
  - Transactions on Software Engineering (TSE), 2019, 2020, 2021, 2022
  - Transactions on Software Engineering and Methodology (TOSEM), 2018, 2019, 2020, 2021
  - Software Testing, Verification and Reliability (STVR), 2018
  - Information and Software Technology (IST), 2018
  - Journal of Computer and Communications (JCC), 2018
  - Journal of Systems and Software (JSS), 2018
  - Empirical Software Engineering Journal (EMSE), 2017, 2021
- **Sub-reviewer** for: *2013*: SAC; *2014*: POPL; *2016*: APSEC, ICECCS, MSR (data track), SATE, SAC; *2017*: IWESEP, ICSME, VL/HCC, RV; *2018*: SCAM, ESEC/FSE (Demo Track)
- **Student volunteer**: ASE 2016, Singapore.
- **Oral conference presentations**:
  - ESEC/FSE 2017, Paderborn, Germany.
  - ASE 2016, Singapore.
  - ISSRE 2015, Gaithersburg, USA.

Software

- JFix and S3: Semantics-based repair of Java programs (ISSTA'17 and FSE'17), built atop Symbolic PathFinder – a notable symbolic execution engine for Java.
  - https://xuanbachle.github.io/semanticsrepair/
- HDRepair: Search-based program repair (SANER'16) using data mining and genetic programming, built atop of gSpan graph miner and Watchmaker evolutionary framework.
  - https://github.com/xuanbachle/bugfixes

Grants

- External grants:
  - ARC DECRA 2022 (Sole PI, $488K AUD): "*Practical Automated Software Bug Fixing via Syntactic and Semantic Analyses*", $438K AUD awarded by ARC and $50K AUD awarded by The University of Melbourne.
- Internal grants:
  - Grant for hiring a postdoc position starting from January 2024 to December 2024, awarded by The University of Melbourne in recognition of my DECRA'22.
  - Seed grant: "*Formally Verified Syntax- and Semantics-guided Automatic Proof Repair*", with Christine Rizkallah, $8K AUD, awarded by Computer Science group, The University of Melbourne.
  - Sole PI, $20K AUD, "*Refixar: Practical Automated Repair of Software Regression Errors*", awarded by The University of Melbourne.
- Collaborator of research grants (awarded to collaborators, not The University of Melbourne):

- Collaborator and assisted in writing part of funding proposal: *Uncovering vulnerabilities in Machine Learning Frameworks via Software Composition Analysis and Directed Grammar-based Fuzzing*, awarded $500K SGD by Singapore government. This project is a collaboration between Singapore Management University (PI), Veracode (security company in Singapore, PI), University of Melbourne (collaborator), and Carnegie Mellon University (collaborator).
- Assisted in writing part of funding proposal: *Human-Guided hybrid Search* (HUGS), a joint proposal between Carnegie Mellon University, University of California Santa Barbara, University of California Berkeley, and University of Wisconsin Madison, awarded NSF Medium $1M USD. I contributed to writing semantics-based repair using symbolic execution and program synthesis.
